

Forward Looking Statements

Certain information regarding the Company contained herein may constitute forward-looking statements within the meaning of applicable securities laws. Forward-looking statements may include estimates, plans, expectations, opinions, forecasts, projections, guidance or other statements that are not statements of fact. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct. The Company cautions that actual performance will be affected by a number of factors, many of which are beyond the Company's control, and that future events and results may vary substantially and materially from what the Company currently foresees.

This presentation does not constitute or form part of any offer for sale or solicitation of any offer to buy or subscribe for any securities in Precipitate Gold Corp., nor shall it or any part of it form the basis of or be relied on in connection with or act as any inducement to enter into any contract or commitment whatsoever. No reliance may be placed for any purpose whatsoever on the information or opinions contained in this presentation or on any other document or oral statement or on the completeness accuracy or fairness of any such information and/or opinions. No undertaking, representation, warranty or other assurance express or implied is made or given by or on behalf of Precipitate Gold Corp. or any of its directors, employees or advisors, as to the accuracy or completeness of the information or opinions contained in this presentation and, save in the case of fraud, no responsibility or liability is accepted by any of them for any such information or opinions or for any errors, omissions, misstatements, negligence or otherwise contained or referred to in this presentation. Juan de Herrera Exploration Targets

TSX.V: PRG OTCQB: PREIF

2025 ·RO MULTIPLE NEW TARGETS DELINEATED

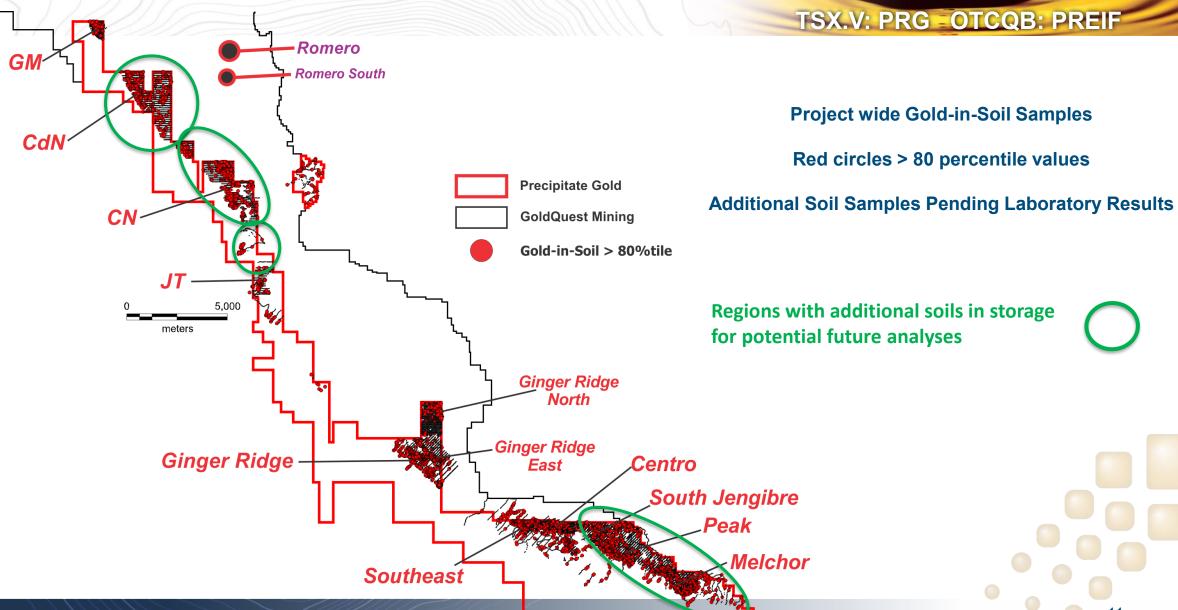

- 8 new priority zones of elevated gold and base metals (copper, lead and zinc) in soil anomalies
- Prioritized 4 zones for up exploration,
 Southeast, Centro, Jengibre South, and CN
- Targets identified via the collection of 17,000+ soil samples on 25m x 50m spacings. Over 14,000 of these soil samples were previously analyzed with a hand-held XRF which led to the identification of ~ 8,000 samples showing elevated base metal and pathfinder elements, therefore warranting full laboratory analysis.
- More than 7,000 soil samples in storage for possible near future laboratory analyses, collected from various project areas, some with minor exploration history.

precipitategold.com

Juan de Herrera Regional Gold-in-Soil

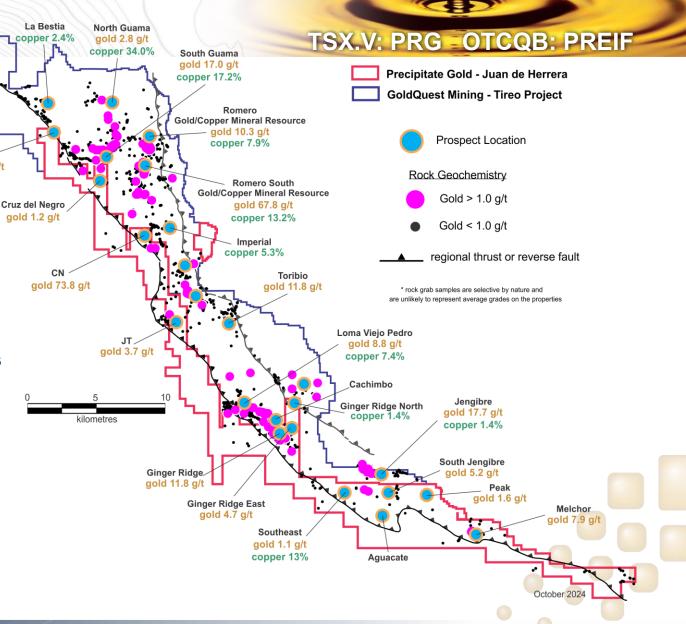

District Scale Potential

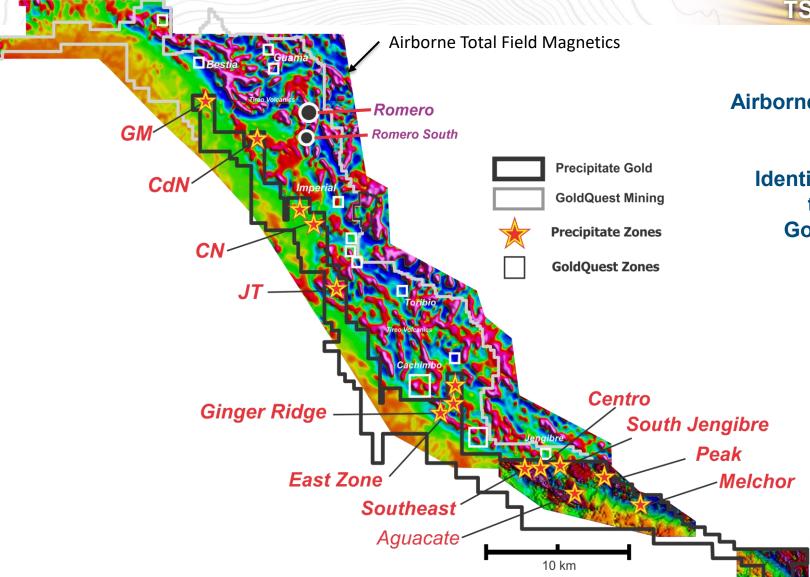

- Host to the multi-million ounce Romero Au-Cu deposit
- Striking more than 60km NW-SE, through GoldQuest & Precipitate Projects
- Tireo volcanics rocks, a highly mineralized belt with values up to 73.8 g/t Au and 34.0% Cu*
- Largely underexplored.
 - High grade rock grab samples are selective by nature and are unlikely to represent average grades on the property.

Juan de Herrera CN Zone Highlights

CN ZONE SAMPLE HIGHLIGHTS

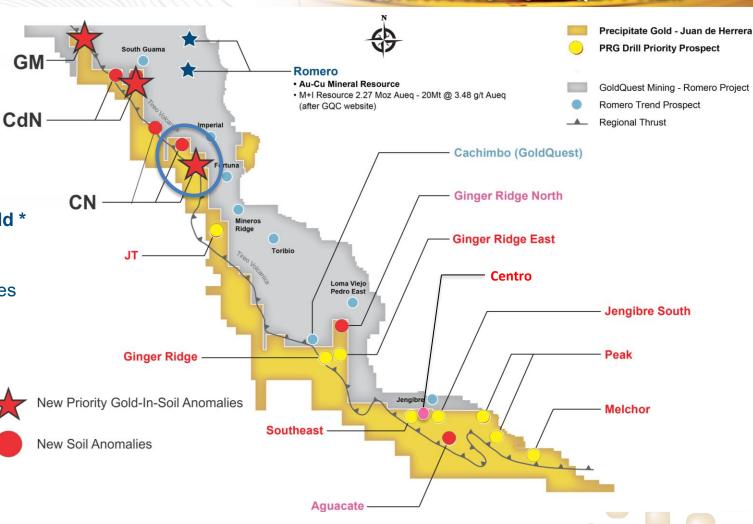

High grade rock grab samples yielded values of:

73.8 g/t gold, 34.9 g/t gold, 11.7 g/t gold, 8.7 g/t gold *

Trench 3: 32.2 g/t gold, 286.0 g/t silver over 5.1m

 More representative outcrop grab samples yielding values ranging from 2.2 to 6.3 g/t gold

 Sampling has demarked an area measuring 700m (north-south) by up to 300m (east-west).

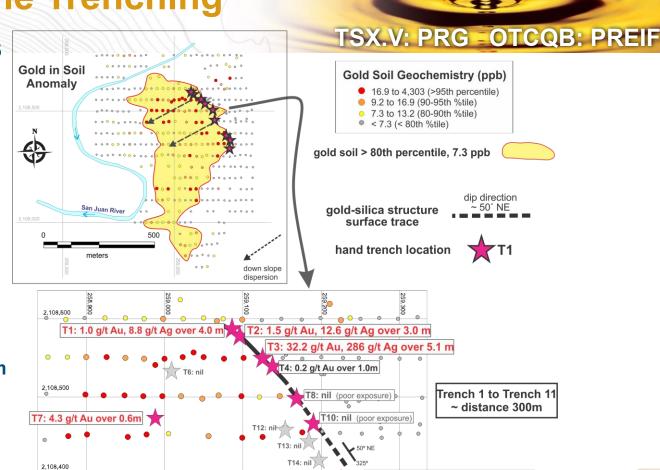

^{*} Rock grab samples are selective by nature and are unlikely to represent average grades on the property.

Juan de Herrera CN Zone Trenching

CN ZONE TRENCH SAMPLING HIGHLIGHTS

Hand trenches returning highlight results:

- Trench 15: 6.4 g/t gold, 6.5 g/t silver over 1.0m
- Trench 11: 4.6 g/t gold, 6.1 g/t silver over 0.6m
- Trench 10: nil Au. Poorly exposed structure zone
- Trench 9: 7.2 g/t gold, 5.0 g/t silver over 2.0m,
 - within 3.9 g/t Au, 4.2 g/t Ag over 5.0m
- Trench 8: nil Au. Poorly exposed structure zone
- Trench 7: 4.3 g/t gold over 0.6m (off-trend and
 - down slope from main structure)
- Trench 5: 83.6 g/t gold, 29.0 g/t silver over 1.0m
- **Trench 4**: 0.2 g/t gold, 2.1 g/t silver over 1.0m
- Trench 3: 32.2 g/t gold, 286.0 g/t silver over 5.1m
- **Trench 2:** 1.5 g/t gold, 12.6 g/t silver over 3.0m
- **Trench 1:** 1.0 g/t gold, 8.8 g/t silver over 4.0m
- The structure has a current strike length of over 285 metres and is open to the south at an offset
- The gold-in-soil anomaly is an estimated area measuring about 700 metres (north-south) by up to 300 metres (east-west). Soils are affected by down slope dispersion to the southwest.

~30m offset

T15: 6.4 g/t Au, over 1.0m

open to south?

T9: 7.2 g/t Au, 5 g/t Ag over 2.0m

T5: 83.6 g/t Au, 29 g/t Ag over 1.0m

Pueblo Grande, General Map

STRATEGIC LAND POSITION – owned 100%

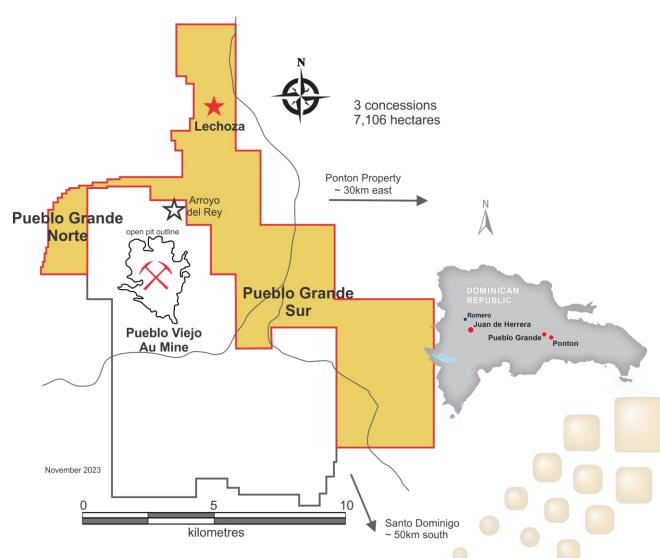

Land package surrounds Barrick's Tier 1 Pueblo Viejo mining operation.

Barrick spent US\$7.0 million in exploration, paid US\$5.0 million in a cash payment as part of an agreement amendment, and granted a 3% NSR on ground now comprising a portion of the Pueblo Viejo mining licenses.

Recent 5-year exploration program completed by Barrick Gold exploration included extensive surface mapping, geochemical sampling, geophysical surveying, and drilling (totalling 22 holes ~6,000 metres) within the two major target areas.

Data compilation and assessment ongoing for future exploration.

Prospective and strategic land package along with 3% NSR on portion of adjacent Pueblo Viejo mining licenses offers unique leverage opportunity.

Strategic Land Positions Poised for Activation and Drilling

Dominican Republic Assets Provide Strategic Optionality

Juan de Herrera Project (owned 100%)

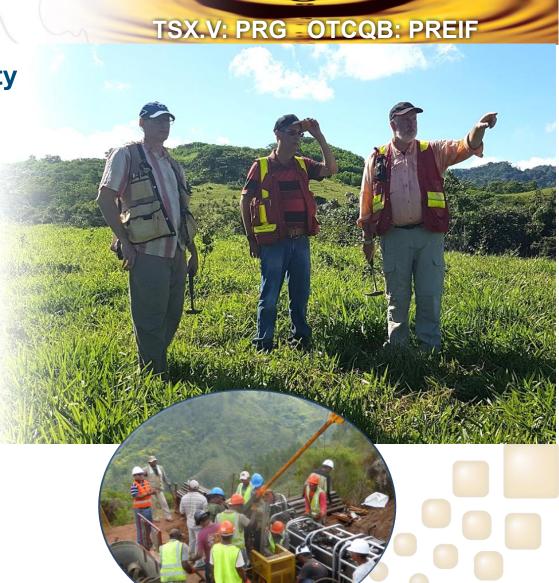

- Strategically located adjacent to Goldquest Mining's Romero Project
- Multiple new geochemical Anomalies Identified late 2024, early 2025
- Expanded and more detailed IP geophysical surveying July and August 2025
- Multiple Advanced and Highly Prospective Drill Targets; Many with Drill Permits.

Ponton Project (owned 100%)

- Coincidental Geochemical and Geophysical anomalies
- Significant Epithermal Target Area Warranting Ongoing Advancement Toward Drilling. Drill ready and drill permitted

Pueblo Grande Project (owned 100%)

- Recent 5-year exploration program completed by Barrick Gold
- Expenditures exceeding US\$7.0 million
- Surface mapping, geochemical sampling, geophysical surveying, and drilling (totalling 22 holes, ~6,000 metres) within the two major target areas
- Data compilation and assessment ongoing for future exploration.
