Forward Looking Statements

TSX.V: PRG OTCQB: PREIF

Certain information regarding the Company contained herein may constitute forward-looking statements within the meaning of applicable securities laws. Forward-looking statements may include estimates, plans, expectations, opinions, forecasts, projections, guidance or other statements that are not statements of fact. Although the Company believes that the expectations reflected in such forward-looking statements are reasonable, it can give no assurance that such expectations will prove to have been correct. The Company cautions that actual performance will be affected by a number of factors, many of which are beyond the Company's control, and that future events and results may vary substantially and materially from what the Company currently foresees.

This presentation does not constitute or form part of any offer for sale or solicitation of any offer to buy or subscribe for any securities in Precipitate Gold Corp., nor shall it or any part of it form the basis of or be relied on in connection with or act as any inducement to enter into any contract or commitment whatsoever. No reliance may be placed for any purpose whatsoever on the information or opinions contained in this presentation or on any other document or oral statement or on the completeness accuracy or fairness of any such information and/or opinions. No undertaking, representation, warranty or other assurance express or implied is made or given by or on behalf of Precipitate Gold Corp. or any of its directors, employees or advisors, as to the accuracy or completeness of the information or opinions contained in this presentation and, save in the case of fraud, no responsibility or liability is accepted by any of them for any such information or opinions or for any errors, omissions, misstatements, negligence or otherwise contained or referred to in this presentation. The contents of this presentation have not been approved by an authorized person.

Corporate Highlights

TSX.V: PRG OTCQB: PREIF

- **C\$7.0M** Current Working Capital.
- **Recent C\$6.5M Placement with Strategic Dominican Institutional Investors** closed Jan 9, 2026
- 100% Owned Dominican Republic Projects, Drill Ready
- **Juan de Herrera** adjacent to 3.5M oz Au eq **Romero Deposit**
- **Pueblo Grande** adjacent to **Barrick's world class Pueblo Viejo Mine**
- Multiple advanced **Geochem/Geophysical** zones targeted for drill testing
- **Ginger Ridge Zone Drilling: 13.4 g/t Au over 5.0m**
- Highlight **CN Zone Trench: 32 g/t Au over 5.1m**
- **Drilling Planned for Multiple Targets at Juan de Herrera**

Directors & Management

TSX.V: PRG OTCQB: PREIF

Jeffrey Wilson President & CEO, Director	30 years experience in mining sector. Background in IR and finance. Welcome Opportunities purchased by Endeavour Mining 2002. Aquiline Resources bought by Pan American Silver. Silver Quest Res. bought by New Gold in 2012 for a value of \$130.0M. Current Director of multiple resource-focused public companies
Alistair Waddell Director	Exploration Geologist, Partner at the NewQuest Capital Group and President and CEO of Inflection Resources. A founder of GoldQuest Mining Corp. and former VP Greenfields Exploration at Kinross. Current Director of multiple resource-focused public companies.
Jose Acebal Director	Dominican national. Extensive experience across industrial operations, infrastructure development, and extractive industries in the DR. Expertise in permitting, logistics, operational execution, and regulatory engagement. Previously with Goldman Sachs in the Debt Capital Markets group covering Latin America. Serves on the boards of several diversified and infrastructure-oriented businesses.
Pelayo Troncoso Director	Dominican national. Co-Founder and CEO of Gamma International Bank, Gamma Securities and Gamma Asset Management. Extensive financial markets expertise and valuable business relationships throughout the Dominican Republic. Board and Committee member of multiple other companies.
John Wenger Director	John Wenger, CPA is a seasoned mining finance executive with more than 20 years of experience in corporate finance, public company governance and capital markets. He currently serves as Chief Financial Officer of Miata Metals Corp. and has held senior leadership roles with several publicly listed mining companies.
Michael Moore VP Exploration	Exploration Geologist with 30 years experience, Gold, Silver, Base Metal and Green-space Metals Exploration. Canada, USA, Africa and Latin America. Current Director of multiple resource-focused public companies

Dominican Republic Assets

TSX.V: PRG OTCQB: PREIF

- Located just 1,500km from continental USA
- Mining friendly. DR exported approximately \$1.5 billion worth of gold in 2022.
- DR is the largest and most stable economy in Central America & the Caribbean

2025 MULTIPLE NEW GEOCHEMICAL TARGETS DELINEATED

- **8 new priority zones** of elevated gold and base metals (copper, lead and zinc) in soil anomalies
- Prioritized four zones for follow up exploration, **Southeast, Centro, Jengibre South and CN**
- Targets identified via the collection of 17,000+ soil samples on 25m x 50m spacings. Over 14,000 of these soil samples were previously analyzed with a hand-held XRF which led to the identification of **~ 8,000 samples showing elevated base metal and pathfinder elements**, therefore warranting full laboratory analysis.
- More than **7,000 soil samples in storage for possible near future laboratory analyses.**

HIGH GRADE GOLD AND COPPER The Tireo Formation

- Host to the multi-million ounce Romero Au-Cu deposit
- Striking more than 60km NW-SE, through GoldQuest & Precipitate Projects
- Tireo volcanics rocks, a highly mineralized belt with values up to 73.8 g/t Au and 34.0% Cu*
- Largely underexplored.
 - *High grade rock grab samples are selective by nature and are unlikely to represent average grades on the property.*

Juan de Herrera CN Zone Highlights

TSX.V: PRG OTCQB: PREIF

CN ZONE SAMPLE HIGHLIGHTS

- High grade rock grab samples yielded values of:
73.8 g/t gold, 34.9 g/t gold, 11.7 g/t gold, 8.7 g/t gold *
Trench 3: 32.2 g/t gold, 286.0 g/t silver over 5.1m
- More representative outcrop grab samples yielding values ranging from 2.2 to 6.3 g/t gold
- Sampling has demarked an area measuring 700m (north-south) by up to 300m (east-west).

* Rock grab samples are selective by nature and are unlikely to represent average grades on the property.

Juan de Herrera CN Zone Trenching

CN ZONE TRENCH SAMPLING HIGHLIGHTS

Hand trenches returning highlight results:

Trench 15	6.4 g/t gold, 6.5 g/t silver over 1.0m
Trench 11	4.6 g/t gold, 6.1 g/t silver over 0.6m
Trench 10	<i>nil Au. Poorly exposed structure zone</i>
Trench 9	7.2 g/t gold, 5.0 g/t silver over 2.0m, within 3.9 g/t Au, 4.2 g/t Ag over 5.0m
Trench 8	<i>nil Au. Poorly exposed structure zone</i>
Trench 7	4.3 g/t gold over 0.6m (off-trend and down slope from main structure)
Trench 5	83.6 g/t gold, 29.0 g/t silver over 1.0m
Trench 4	0.2 g/t gold, 2.1 g/t silver over 1.0m
Trench 3	32.2 g/t gold, 286.0 g/t silver over 5.1m
Trench 2	1.5 g/t gold, 12.6 g/t silver over 3.0m
Trench 1	1.0 g/t gold, 8.8 g/t silver over 4.0m

The structure has a current strike length of over 285 metres and is open to the south at an offset.

The gold-in-soil anomaly is an estimated area measuring about 700 metres (north-south) by up to 300 metres (east-west). Soils are affected by down slope dispersion to the southwest.

Pueblo Grande, General Map

TSX.V: PRG OTCQB: PREIF

STRATEGIC LAND POSITION – owned 100%

Land package surrounds Barrick's Tier 1 Pueblo Viejo mining operation - estimated 600k oz gold production in 2025.

Barrick entered Earn-In and spent US\$7.0 million in exploration, paid US\$5.0 million in a cash payment as part of an agreement amendment, and granted a 3% NSR on ground now comprising a portion of the Pueblo Viejo mining licenses.

Recent 5-year exploration program completed by Barrick Gold included extensive surface mapping, geochemical sampling, geophysical surveying, and drilling (22 holes ~6,000 metres) within two target areas.

Data compilation and assessment conducted by PRG late 2025.

Prospective and strategic land package along with 3% NSR on portion of adjacent Pueblo Viejo mining licenses offers unique leverage opportunity.

Dominican Republic Assets Provide Strategic Optionality

Juan de Herrera Project (owned 100%)

- Strategically located adjacent to Goldquest Mining's Romero Project
- Multiple new geochemical Anomalies Identified late 2024, early 2025
- Expanded and detailed 2025 IP geophysical surveying expands/refines targets
- Multiple Advanced drill targets prepared for near-term drilling.

Pueblo Grande Project (owned 100%)

- Extensive data review of Barrick's 5-year/US\$7.2M exploration data reveals previously unidentified and untested chargeability feature adjacent to Barrick's Pueblo Viejo mine
- Newly conducted 2D IP survey confirms and refines IP chargeability anomalies collectively measuring 800m x 450m and at depths from 100m to 330m

Ponton Project (owned 100%)

- Coincidental Geochemical and Geophysical anomalies
- Significant Epithermal Target Area Warranting Ongoing Advancement Toward Drilling. Drill ready and drill permitted
